Executive Summary

This report was generated by the SDP compliant scanning vendor ScanAlert, under certificate number 3709-01-01 in the framework of the PCI data security initiative and took into consideration security requirements as expressed in the MasterCard SDP Security Standard.

As a "Qualified Independent Scan Vendor" ScanAlert is accredited by Visa, MasterCard, American Express, Discover Card and JCB to perform network security audits conforming to the Payment Card Industry (PCI) Data Security Standards.

To earn validation of PCI compliance, network devices being audited must pass tests that probe all of the known methods hackers use to access private information, in addition to vulnerabilities that would allow malicious software (i.e. viruses and worms) to gain access to or disrupt the network devices being tested.

NOTE: In order to demonstrate compliance with the PCI Data Security Standard a vulnerability scan must have been completed within the past 90 days with no vulnerabilities listed as URGENT, CRITICAL or HIGH (numerical severity ranking of 3 or higher) present on any device within this report. Additionally, Visa and MasterCard regulations require that you configure your scanning to include all IP addresses, domain names, DNS servers, load balancers, firewalls or external routers used by, or assigned to, your company, and that you configure any IDS/IPS to not block access from the originating IP addresses of our scan servers.

ScanAlert's Certification of Regulatory Compliance

HACKER SAFE sites are tested and certified daily by ScanAlert to meet all U.S. Government requirements for remote vulnerability testing as set forth by the National Infrastructure Protection Center (NIPC) and are accredited by the SANS Institute to meet the requirements of the SANS/FBI "Top Twenty Internet Securities Vulnerabilities" test. They are also certified to meet the security scanning requirements of Visa USA's Cardholder Information Security Program (CISP), Visa International's Account Information Security (AIS) program, MasterCard International's Site Data Protection (SDP) program, American Express' CID security program, the Discover Card Information Security and Compliance (DISC) program within the framework of the Payment Card Industry (PCI) Data Security Standard.
