Introduction

GV-LPC2210 is a 2 MP color network camera designed for recognition of reflective license plates on vehicles traveling up at 120 km/h (75 mph) or less with extreme temperature resistance (-40°C ~ 50°C / -40°F ~ 122°F). It is weather proof (IP67). Equipped with a Super Low Lux CMOS image sensor, the camera is capable of displaying a color live view at near darkness. Its multiple high-power LEDs and build-in intelligent IR provide clear license plate for two lanes under low-light conditions at a maximum IR distance of 20 m (65.6 ft.). The motorized varifocal lens take the advantage of its motorized focus / zoom in that the user can remotely adjust the focus and zoom through the Web interface.
