VIVOTEK FD8355HV/55EHV are professional outdoor network dome cameras offering up to 60 fps @ 1.3-Megapixel resolution with superb image quality.

Featuring the new improved Wide Dynamic Range Technology WDR Pro II, it provides extreme visibility in extremely dark & light environments with 4 shutter capture methods. Combined with 3D Noise Reduction Technology, which enables the FD8355HV/55EHV to capture clear, polished video under low-light conditions and reduce bandwidth from sensor noise, users can identify an increased level of image detail in extremely bright as well as dark environments.
Additionally, as a professional day/night camera, FD8355HV/55EHV adopt Smart IR technology which prevents overexposure and provides noise reduction to adjust IR lighting intensity instantaneously based on changes in lighting in the ambient environment.

To provide top-notch image quality, FD8355HV/55EHV also come with a P-iris lens, which controls the iris with extreme precision with its built-in stepper motor. By using software controls, the lens maintains the iris opening at an optimal level at all times, resulting in superior sharpness and depth of field as well as image quality. Furthermore, for installers, properly adjusting the focus of a megapixel network camera can be difficult due to the level of image detail. Thus, FD8355HV/55EHV are also designed with VIVOTEK's Smart Focus System to make installation and adjustment easier by using remote focus and zoom adjustment.

The camera's IP66-rated housing is designed to help the camera body withstand rain and dust and high pressure water jets from any direction while the IK10 vandalproof rating provides protection against the vandalism and impact. Additionally, the wide temperature range further enhances the FD8355EHV's performance and reliability in extremely cold and hot weather.
