

HCPRO-420SC Fire Sprinkler Security Camera

with Standard Analog Resolution and 1080P HD AHD, TVI, & CVI Support

The HCPRO-420SC is a 4in1 HD fire sprinkler security camera that supports **Analog, AHD, CVI, and TVI HD formats**, which are easily switchable using the included joystick. The **3.7mm fixed pinhole lens** provides the user with a wide angle of view, perfect for capturing an overview of the room in which it is mounted.

The covert housing of the camera is disguised as a fire sprinkler and allows it to remain virtually undetectable as a security camera. The mounting bracket allows the camera to be mounted in a drop ceiling without the use of screws or additional hardware.
