

AHD-PIR18 HD Hidden Spy Camera

w/ invisible infrared, AHD, HD-TVI, HDCVI, Analog CCTV video modes

The **AHD-PIR18** is an HD spy camera hidden in a PIR motion sensor housing, allowing the user to discreetly mount this camera indoors. It supports AHD, HD-TVI, and HDCVI HD 1080p modes. The Infrared LEDs featured on this camera are completely invisible, and do not emit a red glow like traditional LEDs. The **940nm IR LEDs** are hidden behind the PIR sensor window, making the camera completely covert when the LEDs are on.

A **fixed 3.7mm lens** produces a wide horizontal viewing angle of about 90°. When using the gimbal wall mount bracket included with **this** camera, users can easily change the angle in which the camera faces.

A built-in audio surveillance microphone allows audio to be recorded in addition to video. This is optional to use. It uses an RCA connection to connect to the audio port of the DVR. The OSD (**On Screen Display**) lets the installer to adjust advanced features such as **WDR** (Wide Dynamic Range), SENS-UP, Shutter Speed, and **3D Digital Noise Reduction**. This camera is an excellent choice for indoor hidden spy camera applications that require full 1080P high definition video.
