VIDEO SERVER

Quick Installation Guide

VS8801
8-CH Audio and Video
Single Stream

VS8401
4-CH Audio and Video
Simultaneous Dual Streams

This guide describes the basic functions of VS8801/8401. All detailed information is described in the user’s manual.
Warning Before Installation

- Power off the Video Server as soon as smoke or unusual odors are detected.
- Keep the Video Server away from water. If the Network Camera becomes wet, power off immediately.
- Contact your distributor in the event of occurrence.
- Contact your distributor in the event of occurrence.

- Do not place the Video Server around heat sources, such as a television or oven.
- Refer to your user’s manual for the operating temperature.

- Keep the Video Server away from direct sunlight.
- Do not place the Video Server in high humidity environments.
Do not place the Video Server on unsteady surfaces.

Do not touch the Video Server during a lightning storm.

Do not disassemble the Video Server. Do not drop the Video Server.

Do not insert sharp or tiny objects into the Video Server.
1 Package Contents

- VS8401 (4CH) or VS8801 (8CH)
- Power Adapter
- Software CD
- Warranty Card
- Quick Installation Guide
- General I/O Terminal Blocks
  - VS8401: 10 pins x 3 pcs
  - VS8801: 16 pins x 3 pcs
2 Physical Description

VS8801

- BNC Video Input
- RCA Audio Input
- SD/SDHC Card Slot
- USB Socket
- Status LEDs
- General I/O Terminal Block
- BNC Video Input
- RCA Audio Input
- Ethernet 10/100/1000 RJ45 Socket
- Power Cord Socket
- Reccessed Reset Button

Click this button before removing the flash drive
Click this button before removing the SD/SDHC card

VS8401

- BNC Video Input
- RCA Audio Input
- SD/SDHC Card Slot
- USB Socket
- Status LEDs
- General I/O Terminal Block
- Ethernet 10/100/1000 RJ45 Socket
- Power Cord Socket
- Reccessed Reset Button

Click this button before removing the flash drive
Click this button before removing the SD/SDHC card
3 Network Deployment

1. Make video connection from the camera to the BNC video input.
2. Make audio connection from the Line-Out audio source to the RCA audio input.

3. Connect the Video Server to a switch via Ethernet cable.
4. Connect the power cable from the Video Server to a power outlet.
5. If you have external devices such as sensors and alarms, connect them to the general I/O terminal block. For detailed pin definition, please refer to the next page.
**Pin Definitions of the General I/O Terminal Blocks**

4 Assigning an IP Address

1. Install "Installation Wizard 2" from the Software Utility directory on the software CD.
2. The program will conduct an analysis of your network environment. After your network is analyzed, please click on the "Next" button to continue the program.

3. The program will search for VIVOTEK Video Receivers, Video Servers, and Network Cameras on the same LAN.
4. After searching, the main installer window will pop up. Click on the MAC that matches the one labeled on the bottom of your device to connect to the Video Server via Internet Explorer.
1. Access the Video Server from the LAN.
2. Retrieve live video through a web browser or recording software.

For further setup, please refer to the user’s manual on the software CD.
Quick Installation Guide

This guide describes the basic functions of VS8801/8401. All detailed information is described in the user’s manual.
